

# Levente Hegedüs

## Senior software engineer

I am Levente Hegedüs, a frontend developer from Budapest born in 1992. I've been working as a frontend developer for 5 years using ReactJS as my main strength for 4 years.

Since 2016 I have worked for small startup companies where I learned a lot about responsibility, how to work independently and to solve problems on my own due to the small development groups. Most of the time the development teams were maximum of 5 or less developers.

My future plans include gaining more experience with backend development and UI/UX planning, too.

## Career

### HTEC Group

Budapest, HU / (2022 - )

Senior software engineer

HTEC Group is a global consulting, software engineering, and digital product development company that helps global disrupters engineer a better future. In our project we rewrite, refactor and evolve an old VueJS application into a new ReactJS application.

---

### Greenfox Academy

Budapest, HU / (2021 - )

Mentor

I had the great opportunity to mentor and teach talented apprentices in a JS Fullstack bootcamp. During the 11 month course the apprentices learned the basics of Javascript, NodeJS, ReactJS, SQL, HTML, CSS and stepped on their path to get their first job as a software engineer.

---

---

## Statzup

Budapest, HU / (2016 - 2021)  
Senior Frontend developer

### Statzup / Consolidity (2019 - 2021)

Consolidity is a smart back-office system which helps with administration processes based on automatization. The frontend was written in ReactJS (with React Hooks and ReduxJS) and in a small part of the project, where we generated PDFs, VueJS was used.

### Statzup / League of Managers (2016 - 2020)

League of Managers is a free daily fantasy football game developed for the Hungarian gambling association. During the World Cup 2018 thousands of users played with the game in Hungary. That was my first ReactJS project. We also used ReduxJS as a state container.

### Statzup / Play The Six (2016 - 2018)

Play The Six was the older version of League of Managers. It was available only in the USA and Latin America. This was my first project at Statzup and the frontend was written in EmberJS.

### Statzup / Footy Cards (2016 - 2017)

Footy Card was a football trading card mobile application. The whole frontend was written in React Native.

### Statzup / oktober31.hu (2019)

Oktober31.hu is a bank client-authorisation site with an organogram creator. It is a sideproject of the Consolidity project. The frontend was written in ReactJS (with ReduxJS) and a small part of the project, where we generated PDFs, VueJS was used.

---

## Raiffeisen

Budapest, HU / (2015 - 2016)  
Junior Java developer

I worked on many small applets. These projects were written in IceFaces which is a JSF Framework.

---

## **Computrend**

Budapest, HU / (2014 - 2015)

Junior Java tester

I tested Java projects created by the development team.

---

## **University of Szeged**

Szeged, HU / (2014)

Junior Java developer

I was part of the Research Group on Artificial Intelligence at the University.

# **Freelancer jobs**

## **Hype & Hyper (2022)**

Hype and Hyper is Central and Eastern European magazine on strategy, trends in design, technology and urban life. We had to rewrite, implement a new design and transfer their old Wordpress site to Ghost CMS.

---

## **Ricsárdgír (2018 - )**

Responsive website for my friend's band. It was an exciting experience to create a really funny website, cool design and also personalized games for them. Almost everything was written from scratch with TailwindCSS and ReactJS.

---

## **drpurcsikatalin.hu (2020)**

I created a responsive one pager website for my medical doctor aunt. The site was written from scratch and uses only HTML, CSS and some Javascript. I also did the design and the SEO for the page.

---

## **legter.hu (2020)**

Interactive map for aviation. Had a chance to get a better knowledge of MapGL and Mapbox.

---

## **VidUX Face Recognition webapplication (2019)**

Webapplication for VidUX company's Face Recognition app. The company required a webapp for their existing application. Me and my project partner was responsible for the UI/UX planning, too. The webapp was written in ReactJS with ReduxJS.

---

## **rhnd.io (2017)**

Responsive onepager for RHND. The site was written from scratch and uses only HTML, CSS and some Javascript.

# **Skills**

ReactJS 5/5  
ReduxJS 4/5  
TypeScript 4/5  
CSS/SCSS 5/5  
TailwindCSS 4/5  
MaterialUI 3/5  
HTML 5/5  
GIT 5/5  
VueJS 3/5  
ReactNative 2/5  
SQL 3/5  
NodeJS 2/5

### **Other skills**

TeamCity, AWS S3, Codeship, Excel, MacOS, SourceTree, Expo.io, inVision, Photoshop, Spark AR, UX/UI planning, EmberJS

### **Personal skills**

Hard worker, Responsible for my work, Innovative thinking, System critical view, Sense of beauty for designs, Clean coding, Team player, Good sense of humour, Empathy

# **Hobbies**

### **Running**

I do long-distance running since 2012. I've completed the marathon 14 times. I can talk about running for hours so I cut it short now.

## **Music**

I'm a really huge fan of all forms of music. I can play the guitar, piano, ukulele and kalimba. I love to go to concerts and I'm lucky that I could perform on stage a couple of times.

## **Football**

I'm a passionate supporter of my favourite football team. I've watched them live in more than 5 different countries. I also write a blog about them.

## **Travelling**

I'm an enthusiast backpacker and traveller. I prefer to do travelling in the unusual way, love to hitchhike and use Couchsurfing as usual as possible.
